IC754VGL12CTD-GH

12" QuickPanel Control IC754CSL12CTD-HH IC754CBL12CTD-HH
IC754CGL12CTD-GH, IC754CSF12CTD-GH

The products listed above incorporate a new touch screen. Full details are provided below.

Product Documentation

Hardware User's Guide: GFK-2284B or later

Functional Compatibility

The new touch screen in the new versions of the QuickPanel View and QuickPanel Control listed above has the same resolution, accuracy and calibration requirements as the touch screen in the existing QuickPanel models.

New Features and Enhancements

The touch screen has been replaced with a custom designed touch screen that will provide improved environmental stability, transmissivity and reliability.

Operational Notes

Users must supply an isolated DC supply to power the QuickPanel View and QuickPanel Control models listed above. The power input to the QuickPanel View, QuickPanel Control must be limited by a slow blow fuse not to exceed a maximum of 100VA. For <20Vdc input, the fuse must be rated for no more than 5A.
